Working Prototype Known Problems Report
Flsh
December 3, 2017

Known Defects:
- Google Sign causes the app to crash after selecting which email to use.
    - Action that causes crash: Selecting "Google Login" then selecting a google email
    - Location of fault: IntialScreen.java
    - Removal: Update the deprecated Google Authentication API

- App returns to the initial screen after prompting for location permission, causing the user to have to sign in twice.
    - Action that causes error: Selecting "Allow" when prompted for user location permission
    - Location of fault: unknown
    - Removal: Try prompting the user when the app first starts, rather than after log in.

- In the android emulator, app will crash after logging in or verifying email.
    - Action that causes error: Selecting "Sign In" when logging in or selecting "Verify New Email and Password" when registering an account.
    - Location of fault: Null pointer exception, MapsActivity.java
        new LatLng(mLastKnownLocation.getLatitude()
    - Removal: This is only a problem on a virtual device, it may have to do with the gps location, that the emulator does not have by default.

- App crashes when trying to register an email that already exists
    - Action that causes the error: Selecting "Verify New Email and Password" when the email inputted is already associated with an account
    - Location of fault: ProfileActivityG.java does not check if email is already associated with an account
    - Removal: Check if email is already in use and display and prompt user for a different email

- Users can input multiple ratings
    - Action that causes the error: Repeatedly selecting the "Submit" button
    - Location of fault: ProfileActivity.java does not check to see if the user has already reviewed the restroom
    - Removal: Implementing a user profile that lists what restrooms have been rated

- Back button on the maps screen does not work
    - Action that causes the error: Pressing the back arrow in the upper right hand corner on the maps screen, however signing out and using the device's back button function normally
    - Location: unknown
    - Removal: Look into where the code for the button is located, possibly delete the button since it is not needed.

- User can sign up with a non-existent email
    - Action that causes error: Selecting "Verify New Email and Password" when the email registered does not exist
    - Location: LoginActivityG.java

- ○ Removal: Add email verification function

- App only displays UCSC restrooms, lack of user input
  - ○ Action that causes error: Accessing the maps off campus
  - ○ Location: unknown
  - ○ Removal: Gain more user input from a variety of locations

- User added restroom locations may not be accurate
  - ○ Actions that causes error: anyone can add a restroom to the database
  - ○ Location: unknown
  - ○ Removal: Add a way to verify the restroom, such as:
    - ■ Instead of automatically adding a restroom, allow users to suggest locations
    - ■ Allow users to report invalid restroom locations
